SUMMARY

I am a Full Stack Web Developer experienced with Ruby, Elixir, Javascript and Python. I build complete web systems such as websites, APIs, admins and more. Currently working for one of the major internet services company in Brazil, mainly with Ruby and Elixir.

I have a Marketing background, which gave me great people skills and made me very customer driven. This prior experience enabled me to quickly grow in the development career, where now I lead two software engineering teams.

PROFESSIONAL EXPERIENCES

Locaweb

Team Leader (since June/18)

Leader of two teams (Domain Registration and SSL). Responsible for the Agile process (we use Kanban), team management, pull request reviews and technical decisions. I still code in Ruby and Elixir.

Locaweb

Ruby Software Developer (July/17 to June/18)

Development of new features and maintenance of Domain Registration's systems using Ruby (Rails and Sinatra), MongoDB, PostgreSQL, Redis and InfluxDB. API integrations, Ruby Gems, OSS contributions. We use Git for version control, and Gitlab CI and Jenkins for deployments.

Campus Code

Web Developer - Ruby on Rails (February/17 to July/17)

Full stack web development for Campus Code's partner companies using Ruby language and mainly the Ruby on Rails framework with PostgreSQL.

Nuance Communications

Senior Marketing Analyst (January/16 to January/17)

Marketing and product management of the Voice Mailbox Service for the top 4 telco companies in Brazil. Creation and follow up of projects to improve the service and KPIs management.

Telefônica Vivo

Marketing Analyst (February/13 to February/16)

Communication and incentives planning and coordination for the company's online self-care channel (Meu Vivo), focusing on cost reduction. Active voice in projects to improve the channel.
